***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

Upon further consideration in view of applicants' arguments presented in the Appeal Brief of December 19, 2005, Claims 1-33 are allowed.

In interpreting the claims in light of applicants' arguments and the Specification, the examiner finds claims 1-33 to be patentable over the prior art of record. The prior art does not teach or suggest, either alone or in combination, a system and method to "request to other terminals to obtain information on the other terminals, wherein the other terminals forward to the selected terminal the information on the other terminals in response to the request." See Brief, p. 14, lines 5-7. The examiner agrees with the applicants that "the sub-manager 10a in Fujino is a distinct and exclusive unit provided for collecting information about terminals and managing them, but it is not a selected terminal which was selected, by a user's designation, among the plurality of terminals originally presented in the network system...[T]he sub-manager of Fujino is only used for managing and controlling the managing objects under the management of agents, and is not one of a plurality of agents or terminals interconnected via a network, as required by each of claims 1, 8, 11, 15 and 17...Accordingly, the sub-manager of Fujino is fixed or set as the manager for managing and controlling the managing objects [and] works as a server computer..." See Brief, pp. 14-15.

The Specification supports this interpretation. In the Specification, terminals is distinguished from a server computer designated for management functions. See Specification, p. 1, lines 10-22.
